

- Allows large volumes of water to pass through while sorbing petroleum, animal and vegetable oils.
- Great for use in oil/water separators, stormwater and wastewater filtration systems and water “polishing” applications.
- When used as a filter medium, water passes freely, while adsorption of target hydrocarbons begins on contact.
- Works well as a fibrous supporting matrix for other water conditioning materials such as selective zeolites, activated carbon, Phos Filter, etc. X-TEX can be “conditioned” to remove pollutants.
- Approximately 85-90% of sorbed oils can be reclaimed from X-TEX and the media reused.
- X-TEX is environmentally benign and user-friendly. It does not leach harmful substances into the environment and when incinerated produces minimal residue or ash.

X-TEX		
Part# 9310	Rolled Fabric, 60" W x 250' L (1,524 mm x 76 M)	Weight: 115 lbs. (53 kg)

U.S. Patent No. 6,632,501

Heavy-Duty Bags Provide Quick And Easy Sediment And Erosion Control

Gravel bags are a basic BMP (Best Management Practice) used to meet regulatory requirements for stormwater and erosion control. The sizes are industry standard and allow the user to fill them up with as much or as little gravel (not included) as the application requires. Different sizes lend themselves to different applications; from drain protection to erosion control at construction sites.

- Made of very high quality polymer material that is woven into shape — eliminates the flaws and failures of sewn edges.
- High UV rating allows multi-year life in sun and elements.
- Rugged material and construction can, in most instances, withstand being driven over, a typical problem with lesser bags.

ULTRA-GRAVEL BAGS					
Part# 9780	Ultra-Gravel Bag, Individual	Dimensions: 19" x 28" (483 mm x 711 mm)	Orange	250 bags/box	60 lbs. (28 kg)
Part# 9781	Ultra-Gravel Bag, Roll Form	Dimensions: 19" x 250 yards (483 mm x 228.5 m)	Orange	1 continuous roll	75 lbs. (34 kg)
Part# 9782	Ultra-Gravel Bag, Individual	Dimensions: 11" x 48" (280 mm x 1,220 mm)	Green	250 bags/box	60 lbs. (28 kg)
Part# 9783	Ultra-Gravel Bag, Individual	Dimensions: 11" x 96" (280 mm x 2,439 mm)	Green	125 bags/box	60 lbs. (28 kg)
Part# 9784	Ultra-Gravel Bag, Roll Form	Dimensions: 11" x 250 yard roll, 2 rolls, 500 yards total (280 mm x 228.5 m)	Green	2 continuous rolls	80 lbs. (36 kg)
