

Chlorine Emergency Kit C

PRODUCT DESCRIPTION:

The Chlorine Institute Emergency Kit "C" is manufactured to the design specifications of the Chlorine Institute. The Emergency Kit "C" contains devices to stop leaks at the safety valve or angle valves of standard DOT 105J500W chlorine tank cars, DOT MC331 cargo tanks and DOT 51 portable tanks in chlorine service. Two instruction booklets explaining the application of each device are included. An instructional video for Kit C is also available.

Features:

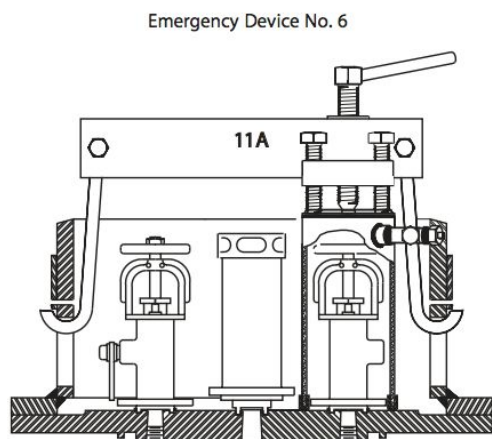

Device #6: containment device designed to contain leaks in and around the angle valves. Device #6 includes two gaskets molded of Viton to conform to the bottom of hood 6A.

Device #24: containment device designed to contain leaks in and around the pressure relief device. Device #24 includes a lightweight, one-piece yoke design #11A for use over the safety relief valve. Device #24 also includes two gaskets molded of Viton to conform to the bottom of hood 24A.

Kit C also includes a variety of hand tools, inspection seals and additional leak containment devices. All items are labeled with a part number, color coded green and stored inside a durable polyethylene tool box.

Authorized, trained personnel equipped with suitable respiratory equipment should investigate chlorine leaks promptly. All other persons should be restricted from the affected area. Breathing apparatus or other personal protective equipment are not included in the kits, but must be used when investigating and correcting chlorine leaks and are available

Note: All C-kit components are now packaged in an extra-large polyethylene tool box (36" L x 18-1/2" W x 20" H) to allow room for fully assembled devices and accessory emergency equipment.
