

Solutions beyond your expectations

## HISTOSOL BIO10

Before

After

### **PRODUCT DESCRIPTION:**

Histosol Bio10 is a ready-to-use liquid bacterial formulation specifically designed to provide improved waste degradation and control odors for residential, municipal, and heavy industrial wastewater applications with high Biological Oxygen Demand in the range 3,500 to 10,000 PPM.

Histosol Bio10 contains a synergistic blend of new Bacterial strains which have been scientifically developed (selectively adapted) to cope with difficult compounds and chemicals present in wastewater effluent. Unlike any other bio-formulation, Histosol Bio10 contains bacterial strains which actually digest difficult and non-biodegradable compounds such as detergents, paper, oil, grease, hydrocarbons, phenols, etc.. Histosol 9840 is the carrier for this microbial blend, providing immediate odor control as well as stimulating microbial growth and performance.

Histosol Bio10 bio-formulation provides exceptional results when utilized to accomplish reseeded of wastewater and septic systems where chemical kills have occurred and for the continued maintenance of bio-systems to insure optimum performance.

Histosol Bio10 formulation significantly improves the performance of septic tanks, lagoons, activated sludge, trickling filter and waste holding basins. This product will also dramatically reduce odors emitted by wastewater treatment systems.

## FEATURES AND BENEFITS:

- Digests difficult compounds which are toxic to naturally occurring bacteria or existing sewage bacteria.
- Control of hydrogen sulfide, mercaptans, amines, and ammonia odors.
- Provides rapid breakdown of difficult detergents, fats, oils, tissue, hydrocarbons, etc.
- Cultures grow in either the presence or absence of oxygen.
- Long-term stability (1-2 years).
- Non corrosive, non-pathogenic; safe to handle and store.
- Can be used as supplied.
- Each batch is tested and standardized for a high level of quality.
- Certified salmonella-free.

### Histosol Bio10 Typical Characteristics

Biological	Physical
Bacterial strains <ul style="list-style-type: none"><li>• Protein digesting bacteria</li><li>• Starch digesting bacteria</li><li>• Cellulose digesting bacteria</li><li>• Detergent digesting bacteria</li><li>• Fat, grease and oil digesting bacteria</li></ul>	Appearance: Dark Brown Odor: Musty Fragrance Specific Gravity: 1.04 pH: Neutral Effective pH range: 5.0-9.8 Effective temperature range: 40-145 F Standard Packaging: 5-250 gallon Shelf Life: 1-2 years

### Optimum Conditions for Use

Bacteria in Histosol Bio10 perform within a pH range of 5.0 – 9.8 with the optimum near pH 7.0. Temperature affects the activity of the working solution and action increases with rising temperatures up to 145 F. No activity can be expected below 40 F. (5 C.)

### Storage and Handling

Storage: store in a cool, dry place

Handling: avoid excessive inhalation

Wash hands with warm, soapy water after handling

### Recommended Dosage Schedule

Area	Dosage	Frequency
Waste Lagoons	50 PPM 5-30 PPM	Initial Application Daily

For problem systems, double the recommended feed rate for the first two weeks.
